

INSTALLING E*TRADE PRO ONTO OS/WINDOWS:

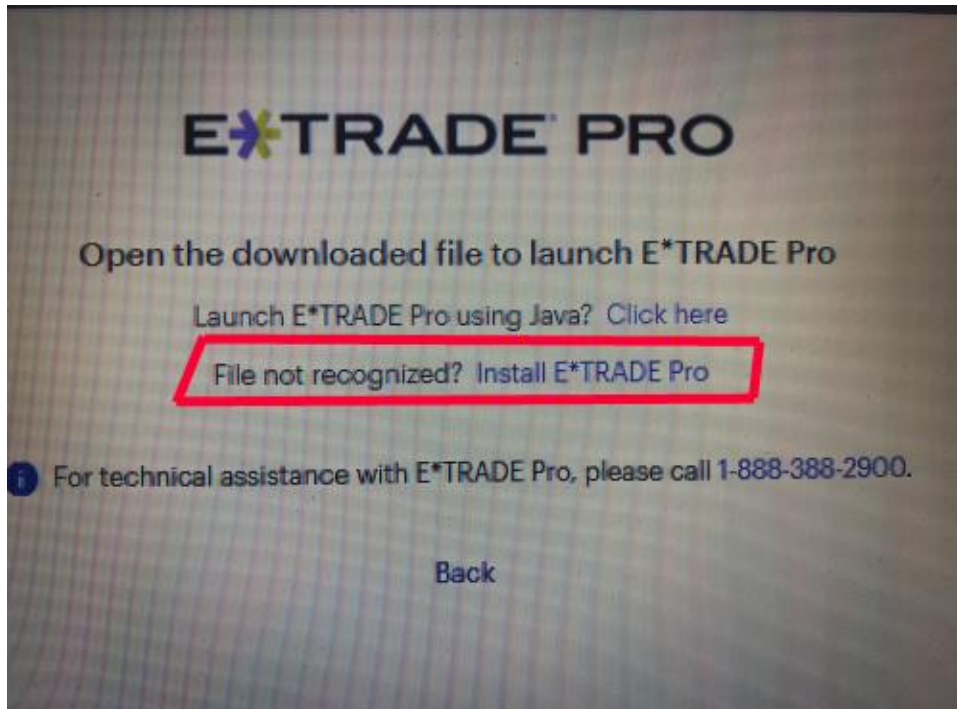

After opening an e*trade broker cash account from <https://etrade.com>, there will a LAUNCH PAD to the right after signing in.

Click on the Launch button for E*TRADE Pro.

For OS the application should download immediately and can be installed after clicking on the downloaded file.

For Windows a file will download and another screen will come up...

Delete the file that was automatically downloaded to the Windows device when the Launch button was clicked on.

On the screen that appears click "Install E*TRADE Pro" after "File not recognized?"

Another file will download... after which the application can be installed after clicking on the file.
