NOTES
green steps
green steps
limit out @ 13.55 hit but did not stick
ACCIDENTAL LIMIT IN... DID NOT CANCEL IN TIME
did not take the 10 cent gain on red candles... hoped for too much on red... late buy on red yoyo/bottom end wick
pushed luck with green rejection wick showing green steps but with rejection wicks
tried to bounce on green wickedy wick
traded above line of last peak/green steps
traded above line of last peak/green steps
traded above line of last peak/green steps
bought at resistance line... big resistance wick/trap sprang up... no green succession
ignored/missed the very quick 10 cent gain... volume too low to level up any further
ignored the 5 cent gain when 7.75 was a possible point of contention
red heading down... as opposed to green heading up... ignored the bottom end swing line @ 6.10
ignored/missed the very quick 10 cent gain with TWO MAJOR rejection wicks showing
ignored/missed the 5-10 cent gain
general decline on slow action... no chance of 5 cent gain... should have settled for even or ANYTHING above even
stock car racing new highs on slow action
stock car racing new highs on slow action
stock car racing new highs on slow action
tried to time a quick and short-lived fluctuation on a HUGE resistance/reversal wick
continuation (see previous note)
see previous notes
probably drank some koolaid in anticipation of a rapture... or anticipated a weak 1.5 step candle
played the top end of a swing and general decline
top end of gamma declining and showing resistance/reversal wicks so it was basically pushing the same limit in point
